A RARE EXPERTISE AND EMPATHY

Our owner, Jason Grant, is a 3rd generation tradesman who's performed every role of the trades: electrical, solar, HVAC, plumbing. This background offers him a hard-to-find set of technical expertise. But, it also exposed him to the pain points of homeowners and instilled in him a mission to make his clients, and therefore Cozy Home Services' clients', lives better. Everybody at Cozy is obsessed with finding the right solutions to benefit homeowners today, tomorrow, and well into the future.

Here are Jason's credentials: A TECHNICAL DEGREE, NEXSTAR CERTIFIED, BPI CERTIFIED, MITSUBISHI ELITE DIAMOND CONTRACTOR, TRANE COMFORT SPECIALIST, C36 PLUMBING LICENSE, C46 SOLAR, C20 HVAC

A COZY HOME IS...

**ONE THAT EFFICIENTLY WORKS
FOR YOUR OVERALL WELL-BEING**

Our solutions are custom designed for your specific needs. In fact, most of our Net Zero Applications customers get free heating, cooling, and electric through tax rebates and credits. Cozy Home Services specializes in Building Science Applications. Basically, your home is a system and we have the rare expertise to make that system work to your benefit in ALL ways: **COMFORT, HEALTH, SAFETY, FINANCES**. For years, Cozy Home Services has been ahead of the Federal government and California in knowledge, urgency, and service when it comes to efficient, green, low-cost technology in homes and buildings.

More important than our specialty in Building Science Applications, however, is our sincere concern for you. We are a company with HEART. As "mushy" as that is, we don't know a better way to put it. Before we see your home, before we meet you, we've already committed ourselves to improving your well-being. This is infused through our company's culture and behavior. We don't train for it. It's simply who we are. Everybody who works at Cozy is hired because they already embody that HEART.

So, if we say the right solution for your home is 22 solar panels, that means 21 panels won't do the job and 23 is unnecessary. We work side-by-side with you to figure out what is BEST FOR YOU, not our bottom line.

FINDING YOUR RIGHT SOLUTION

BEGINS WITH A WHOLE HOME PERFORMANCE ANALYSIS

- 1 We sit down and talk **with you** to understand the root cause of your pain.
- 2 We walk through the house to come up with ideas for solutions.
- 3 We determine your options based on the efficiencies/inefficiencies we've identified.
- 4 We present options that **make sense** to you and your family. Because we are low-pressure and consultative, we make it as easy as possible for you to make a decision.

FULL LIST OF SERVICES AND EXPERTISE

- INVERTER HEAT PUMPS
- WHOLE HOME ELECTRIFICATION
- HEAT PUMP WATER HEATERS
- SOLAR & BATTERY INSTALLATION
- HVAC SERVICES
- AC INSTALLATION & MAINTENANCE
- ATTIC INSULATION
- HEATING INSTALLATION & MAINTENANCE
- WATER & AIR FILTRATION
- DRAIN CLEANING & SEWER LINES

INVERTER HEAT PUMPS

An all-electric heating and cooling system that is literally the most energy efficient product in the world. When paired with solar panels, this reduces the amount of electrical load on your home and drops the bulk of your gas bill.

WHOLE HOME ELECTRIFICATION

Removes all gas in the house, sparing you rate hikes from the gas company and removing the risk of carbon monoxide poisoning and gas-caused fires.

HEAT PUMP WATER HEATERS

Removes another gas appliance and heats all the water in your home with less energy consumption than a coffee maker. It also air conditions the space it's installed in.

SOLAR & BATTERY INSTALLATION

This is not a bandaid solution. We identify the inefficiency resulting in the high power bill and install the proper amount of solar to solve the problem (no more, no less).
